**EPIC PROJECTS
and CONSULTING**

Testimonial

I have been associated with Joe Rossi and his firm Epic Projects and Consulting for 10 years. Impressed with their attention to detail and professional approach. We get good designs with projects progressing smoothly and completion always when expected. Joe Rossi has always attended and ensured that all was in order for sign off by Council. Epic Projects and Consulting has provided good sound construction advice and consistent quick turnarounds on documentation. They are my first choice for Engineering Solutions.

Building Design and Land Developments*

We always find a solution to your needs and vision.

We Are Different

Our approach is simple – make it easy for everyone. We do this by being approachable, easy to contact, nothing is too much trouble, and most importantly have a simple process that our clients can understand.

We take you through the journey and explain what we are doing and when. We listen, ask questions and involve you in the design or delivery process at agreed steps. You get the results you are after with cost savings from the commencement of the project.

Are you creative and innovative, inspired by unique designs or ideas?

With over 6 years of experience, we are your engineering experts. We add value by combining the theory of engineering with the practical building aspects. We are engineers with a builder's licence.

Why is innovation important to us?

The modern world needs a new way of thinking and a business strategy to thrive and take advantage of the advancing technology and fast paced changes.

Our culture and approach takes advantage of this. We provide exceptional engineering and project services in an innovative and creative way. Doing it different, from our customer focus to the culture that cares and puts in the extra effort.
