DIFFERENCE.**

*Let us project manage
your world for you*

**EPIC PROJECTS
and CONSULTING**

Project & Contract Management Services

Project Planning

We will consult with you and create a Project Management Plan and include all the associated project documentation. This plan will make sure that we deliver on time and on budget to the specified quality you are after. We are known for using our experience to provide information that is clear and concise.

Consultation and Stakeholder Liaison

Engaging effectively with stakeholders is paramount to project success. EPIC Projects has experience in dealing with a wide range of stakeholders. We have the expertise to ensure stakeholders are part of the project journey, making achieving project goals and deliverable achievable. We will identify and analyse key stakeholders and their needs, coordinate a consultation process to ensure all stakeholders are kept informed.

Scheduling and Cost Control

Proper time management is critical to meeting important deadlines and keeping the project within budget. EPIC Projects strives to maintain your projects on schedule.

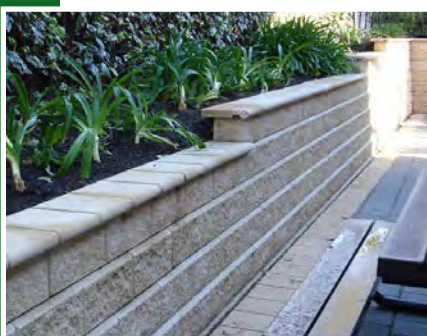

Cost control is directly linked to the project's work breakdown structure because costs for schedule activities are estimated for all resources charged to the project.

EPIC Projects understands the importance of careful estimating and tracking of budgets to control project costs. By creating baselines for the project's schedule and costs and by tracking them accordingly, deviations from the baselines can be managed and put back on track with schedule and cost controls.

Our Project management is designed to save you money and reduce risk. We will deliver quality to the agreed timeframe.

Our approach is to work with you, and to consult or develop a scope that is workable, manageable and deliverable.

Achieving our client's vision and project profit expectation is one of our key objectives. Delivering projects safely and to a high quality is essential.

Our team of project managers are experienced specialists that provide the necessary skills and leadership to manage the difficulties of the planning, design and construction process.

Contract Management

EPIC Projects can assist you with managing your contracts to ensure that you comply with your contract obligations. Our team has comprehensive contract management experience and knowledge. We can support our delivery capability through all contract phases.

Risk Management

EPIC Projects applies risk management processes and practices for all of our projects. In consultation with our clients we develop risk management plans that are then integrated into the project management process to ensure that risks are identified, managed or mitigated before they can influence the projects.

We facilitate structured risk workshops and provide expert input into the identification and evaluation of risks. We will establish a risk management plan, prepare a risk register, assess the risks and initiate a management plan with appropriate action and follow up.

This enables project stakeholders to communicate risk management strategies and respond to the risks.

Project Management Office

We are PMO Specialists. We provide services and solutions across portfolio, project and project management offices. The PMO will support the relationships between all groups involved in the project, and ensure that all relevant information is communicated to the correct people at the correct time delivering value to your stakeholders.

Construction Management

To ensure the best outcome for your projects, you need people who know what they are doing every step of the way. Our experienced construction professionals provide effective leadership, sharp attention to detail and a valued partnership you can count on.

About Us

Established in 2008 and situated in Adelaide, we provide project and contract management services, and site supervision for residential, commercial, industrial and infrastructure projects.

Epic Projects has expanded to offer management consulting and general business advice, and is supported by an internal engineering design and technical division.
